

Information for Energy Efficiency Improvement - Dashboards, Displays, Reports and Other Measures to Change User Behaviour

London Campus of Coventry University, 9th Feb 2012

This free workshop builds on previous 2011 events at Oxford and Manchester (see www.goodcampus.org for presentations from both, and a RECSO briefing paper on the former). It is a response to rising prices, carbon regulation, HEFCE targets and other drivers for minimised energy consumption. Better information about usage patterns, and changes over time, is a key part of achieving this. This has long been understood by energy managers but hardware and software innovations are now enabling many more people to access and use energy data, and for it to be displayed in buildings. Many universities and colleges are taking advantage of these capabilities, but often in isolation. In addition, there is considerable uncertainty about how information should be provided in order to motivate changes in user behaviour. The aims of this event are therefore to:

- Share experience and learning;
- Build and strengthen a network of those interested in the topics, and to
- Discuss how people perceive and use energy information and the implications of this for dashboards and display design, reporting and other actions.

The event is being funded by JISC, and has been organised by three JISC Green IT projects – DELTA and Green IT for STEM at the University of Bradford and RECSO (Responsible Energy Costs, led by Forum for the Future). Both are associated with the SustelIT initiative. See <http://www.jisc.ac.uk/whatwedo/topics/greenict.aspx> for more information. Places can be booked at www.goodcampus.org.

Information for Energy Efficiency Improvement

London Campus of Coventry University, 9th Feb 2011
East India House, 109-117 Middlesex Street, London E1 7JF

Programme

12.00	Registration and refreshments
12.45 – 13.00	Introduction <i>Rob Bristow, Green ICT Programme Manager, JISC Peter James, Professor of Environmental Management, University of Bradford and Director, SustelT</i>
13.00 – 13.30	Energy Displays and Information at Coventry University <i>Elise Smithson, Deputy Director, Environment and Low Impact Buildings Centre Based on Coventry's JISC funded CUSTOMER project which uses (serious) games to create behavioural change in student accommodation</i>
13.30 – 14.00	Effective Communication of Energy Information <i>Steve Connor, MD, Creative Concern; Laura Williams and Robert Croll, Green Impact Coordinators, Manchester Metropolitan University</i>
14.00 – 14.30	Energy Dashboards in Laboratory Settings <i>Russell Smith, Estates Manager, and Hilary Pape, Lecturer, University of Bradford; Roland Triance, Director, and Christian Meichsner, Fume Cupboard Service & Maintenance, Waldner</i>
14.30 – 14.50	Refreshments
14.50 – 15.50	Small group discussion
15.50 – 16.15	Final Q&A/Discussion
16.15 (approx)	End of Event

Venue information: <http://wwwm.coventry.ac.uk/londoncampus/aboutus/Pages/Location.aspx>
(5 minutes from Liverpool Street Station)

There is no charge for the event. Knowledgeable vendors who can contribute their experience to the discussions are also welcome. As we expect the event to be very popular, cancellations after February 1st, and no shows that are not due to illness, will be charged at £50. Please book by visiting www.goodcampus.org Events section.
